

SSN Trace

Find matches others miss.

SAY HELLO TO MORE RELIABLE RESULTS

Verify individuals by collecting current and historical identifiers, including verified addresses and known aliases, to conduct a more comprehensive criminal background check. Through our API, you'll access millions of consumer records, improve efficiency with high-volume results, experience faster turnaround times, and encounter fewer costly disputes.

EXPANSIVE COVERAGE

The SSN Trace solution ensures coverage requirements are met by leveraging multi-bureau header files along with proprietary alternative header sources. Together, these data sources deliver the coverage, accuracy, and completeness necessary for reliable screening outcomes.

The API supports standard XML and REST gateways with intuitive JSON responses, allowing for fast integration without requiring changes to your existing infrastructure.

YOUR FAVORITE TOOL FOR SMARTER CHECKS

Broader Coverage: Multi-bureau data delivers stronger, more reliable trace results.

Locate the Hard to Find: Effective even with limited inputs and sparse records.

Painless & Flexible: Cost-effective API with customizable filters for easy setup.

UNLOCK LIMITLESS FLEXIBILITY THROUGH CUSTOMIZABLE FILTERS

Our advanced filters give you full control over how trace results are returned, so you get only what's relevant to your use case. Easily customize logic, thresholds, and data elements through the API to match your workflow and compliance needs. This flexibility helps reduce noise, lower costs, and speed up decision-making.
